Start and Stop Scripts

The Dashboard provides the ability to Start or Stop a script/task.

Expanding a script row or task row shows the Start and Stop buttons.

Keep in mind that the directives to Start or Stop a script are retrieved by the Task Launcher running on the machine or session. It checks in once per minute with the Dashboard. It could take up to a minute to see the script start or stop.

Starting a script will create a new row on the Script Tab.

NOTE: To successfully Terminate a script it must be in a **Processing** status. For example, if it is in a Debugging status, we are not able to interrupt the process and terminate it.

Script Tab

Script Details		Task Created?		Expected Start		Actual Start		Completed		Processed Records		Actions	
NPI.EMUE ⓘ ⏱ Processing 🖥 [NAMELESS HOST] ⚙		YES ✓ NPI Lookup		-		Dec '20 **2** Wed 8:42 AM		Not yet complete		0% 0/0		🚀 Start 🛑 Stop	

Tasks Tab

	NPI Lookup from NPI.EMUE 🕐 Running 🖥 201911-02 ⚙	ⓘ	Dec '20 **1** Tue 5:01 PM	Dec '20 **2** Wed 5:00 PM	At 11:00 AM every day – After triggered, repeat every 1 hour for a duration of 6 hours.	💡 Disable	🚀 Start	🛑 Stop 🗑

Terminated Status

Script Details		Task Created?		Expected Start		Actual Start		Completed		Processed Records		Actions	
NPI.EMUE ⓘ Terminated 🖥 [NAMELESS HOST] ⚙		YES ✓ NPI Lookup		-		Dec '20 **2** Wed 8:42 AM		Dec '20 **2** Wed 8:44 AM		38% 23/60		🚀 Start
